WORK HISTORY

Training Manager, Jaheziya, Abu Dhabi, UAE

2013 – Present

A demanding role, where I am responsible for the day to day running of the training department of Jaheziya. I am responsible for coordinating and controlling safe operations of all aspects required for the efficient delivery of training courses. This includes planning, organisation of the instructors, support and technicians. The training centre has a large campus and runs a variety of different training types from Firefighting, First Aid, Survival, Damage Control and General Health and Safety. As Jaheziya is a relatively new company, I am also assisting in implementing their Quality and Health and Safety Systems, as well as supporting from a technical role, advising and coaching instructors and technicians.

Building client relations is also a key part of the role. I work closely with our clients (including the UAE Military) and look at company specific training, as well as advise on training types which might best suit the client.

Moreover, I am involved in the training and development of Instructional staff. I work with them to develop and update current and new training material, and ensure delivery of a quality service.
